

Nick Kypreos					(4)	LW W
Hartford 92-93					11/0/1	SHFT 6
AST	EVEN		PP	SH	LP	5
1-24	1-3	SH5	1-10			
25-40	4-5	SH4	11-16		DEF	3
	6	SH3		1	TAKE	3
	7	SH2			HIT	7
	8	SH1			BLK	3
		SH0			BRK	6
	9-15	GIVE	17-23	2-7	AST	2
	16-37	PASS	24-37	8-12	PEN	11 (23)
	38-40	AST	38-40		MAJ	8 (9)
		ICE		13-40	MIN	36 (2)
					MIS	37 (13)

GP: 75 G: 17 (0/0) AST: 10 PIM: 325

The (23) is the new FIGHT rate

The (9) is the new Misconduct off a MAJ rate

The (2) is the new Misconduct off a MIN rate

The (13) is the new Match off a MIS rate

Everything works the same as the other penalty system with the exception of possible additional penalties being called on the same play. After getting the initial 1-38 number that falls into whichever type penalty (MAJ, MIN, MIS) you would check to see if there is a possibility of an additional penalty being assessed on the whistle. If the player does not have a (##) rate next to the type of penalty called your done. If the player does have additional ratings (##) next to the penalty type (I picked Kypreos because he has them all) then you would flip another FAC and check the 1-40 PASS TO number to see if more minutes gets added on.

If a misconduct comes off the additional minutes check you would once again flip and check to see if the player could get a Match penalty. One more FAC flip to check the 1-40 number under PASS TO would be used to check the players Match rate against the number. Obviously if the player does not have a Match rate there would be no need to check.

The numbers no longer have a range for MAJ, MIN and MIS. The 1-38 number for penalty type check are read from top to bottom. If the 1-38# is less than or equal to the type penalty then that is the call.

Ex. Kypreos has ranges from

MAJ: 1-8

MIN: 9-36

MIS: 37

A 38 would be no penalty, faceoff

Fighting majors:

You still use the same process as before getting a reading from the AST section of the FAC but instead using the PEN rate you would use the FIGHT rate. If it refers to a position that doesn't qualify then make the fighter the highest on the ice.

Ex. We have a team that has a lineup with FIGHT ratings of

LW  
2

LD  
10

C  
1

RD  
5

RW  
blank

FAC AST  
SECTION

LD (1) LD has a rate that is  $\geq 1$  (10) so he is the other fighter  
RW (2) RW has no FIGHT rate so he is not the fighter, instead go with high on ice LD  
C (5) C rate 1 is  $< 5$  needed so no fight for him, instead go with high on ice LD  
2ND HIGH Figure the 2nd highest in ice which is RD

Opposing players:

You would also check for additional penalty minutes even if the player was not the instigator of the original PEN check. So coincidental minors and fights could have you check for additional minutes for all players involved.

The (\*\*) reading is an automatic additional assessment with no need for a 1-40 number check. It would be considered a (40).
